

# HOW TO CLEAN JUNK AND REDUCE LAG IN WINDOWS 11

## 1. Run Disk Cleanup

- Press Windows + S,  
type "Disk Cleanup", and open it.
- Select your system drive (usually C:).
- Check boxes for:
  - Temporary files
  - Recycle Bin
  - Thumbnails
  - System-created Windows Error Reports
- Click OK to delete them.

## 2. Enable Storage Sense

- Go to Settings > System > Storage  
>Temporary files> Refresh and Remove all

## 3. Disable Startup Apps

- Press Ctrl + Shift + Esc to open Task Manager.
- Go to the Startup tab.
- Disable apps with high startup impact  
that you don't need immediately.

## 4. Use Cleanup Recommendations

- Go to Settings > System >  
Storage > Cleanup Recommendations.
- Windows will suggest large files, unused apps,  
and duplicate content to remove

## 5. Clean Temp Files Using Run

- Press Win + R to open Run
  1. type "**temp**" opens a folder with temp  
memory files delete them all, if any error pops  
click on skip
  2. type "**%temp%**" opens a folder with temp  
memory files delete them all, if any error pops  
click on skip
